

Measuring Instruction

Curtain on rings - Z15

For the curtain to fit perfectly, selected place has to be correctly and precisely measured

The following auxiliary drawings must be strictly observed

A - WIDTH

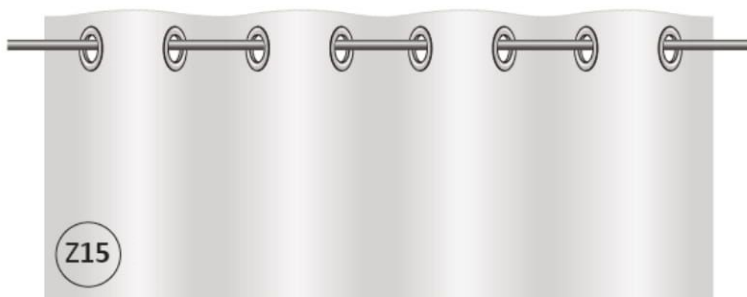

Width of the curtain rod = the width of the gathered curtain

B - HEIGHT

Distance from the top edge of the curtain rod to the floor or window sill **by adding 2cm above the circle, or add 15-20cm if you want the curtain to lie on the floor**

Ring diameter 4cm, Stiffening tape 10cm.

Ring colors: silver, satin, patinated bronze. Gathering 1: 2

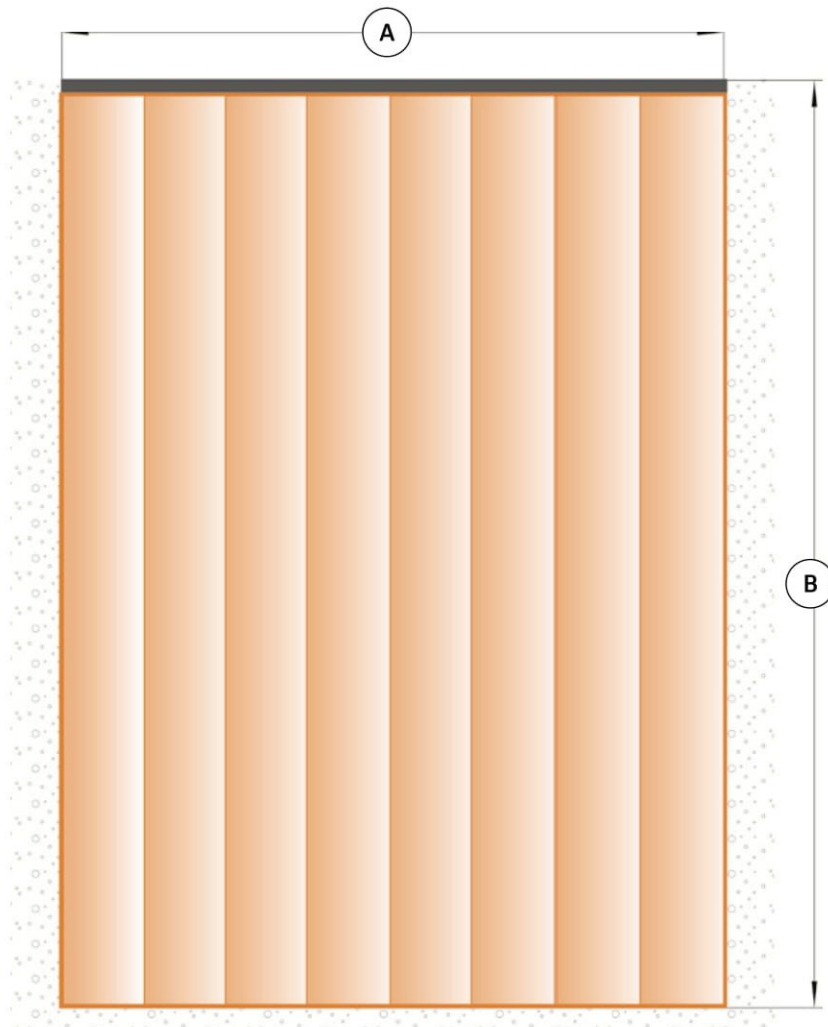

*We give all dimensions in millimeters

Measuring Instruction

Curtain on rings - FLEX2

For the curtain to fit perfectly, selected place has to be correctly and precisely measured

The following auxiliary drawings must be strictly observed

A - WIDTH

Curtain width = width of the gathered curtain

B - HEIGHT

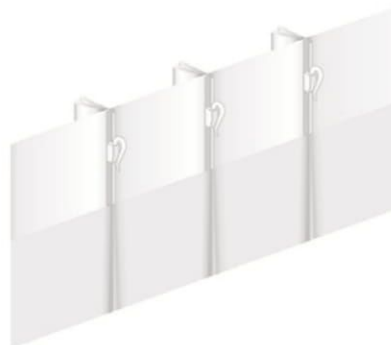

The total height of the curtain is the height measured from the ceiling or where the rail bracket is top mounted to the floor. Or add about 15-12cm if you want the curtain to lie on the floor

In the case of curtains hung in sets, the side of the curtain should be given: left or right

FLEX2 Gathering 1:2.0
